Account		Fund		Dept.	
55107	Instructional Services	15000	General Fund	842248	Science / Cambridge Partners

Respectfully Submitted,

David Murphy
Superintendent of Schools

SUPPLEMENTAL INFORMATION: City Sprouts

Purpose: To provide support and guidance for the schools garden projects

Amount of Contract: \$145,000.00

Description/Scope of Services:

The City Sprouts program builds schools' capacity to integrate school gardens as an instructional resource for teachers, an effective and engaging means for food and health education for students, and a unifying center to strengthen school communities and family involvement. City Sprouts serves all Cambridge Public School (CPS) elementary and upper school students (pre-K through 8th grade). City Sprouts will provide the following services to Cambridge Public Schools from September 1, 2026 – June 30, 2027:

- Oversight of school gardens in elementary and middle schools. City Sprouts staff oversees planning, planting, maintenance and harvest of all CPS schoolyard gardens (and ancillary plots, where appropriate) and facilitate school and community use of the school garden as an educational resource for teachers, children and families.
- Support for teachers' use of school gardens for instruction. City Sprouts provides all CPS elementary and upper schools with support staff for ten hours per week from September through June. City Sprouts provides additional grade level and all-staff professional development activities for teachers, as requested by each school's leadership.
- Support for students' health and wellness. City Sprouts staff supports teacher and behavior specialists' use of the school garden for students' social emotional and trauma-sensitive learning.
- Out-of-school time programming for middle-school youth. City Sprouts summer and after school program serves 150 middle school youth through programming based at the four Upper School campuses. City Sprouts' Science, Technology, Engineering and Math (STEM) service-learning curriculum is designed to ignite young people's interest in science and engineering through the ecosystem of the garden. The curriculum dovetails with students' school year science instruction and mitigates learning loss in the summer.
